- HTML
- CSS
- JavaScript
- MYSQL
- App Designer
- UI / UX Design
- Web Designer
- C
- C ++

PROJECTS

PROJECT 1 - LMS (LEARNING MANAGEMENT SYSTEM)   *(AUGUST 2019 – JULY 2020)*

- As the Project Leader of a web-based Learning Management System (LMS) project, I oversaw the development of a comprehensive platform aimed at facilitating student learning and enabling colleges to administer exams.
- This project, constituting my diploma project, involved managing frontend and backend development alongside database implementation, with a focus on generating revenue through the platform. This short document outlines my role, responsibilities, and contributions to the project.

PROJECT 2 – BANK MANAGEMENT SYSTEM   *(JULY 2020 – AUGUST 2020)*

- I created a secure banking web app for account creation and fund transfers, ensuring seamless user experience and data integrity. Leveraging frontend, backend, and database technologies, the platform prioritizes simplicity and responsiveness for efficient transactions across devices.
- Continuous monitoring and updates are vital for maintaining reliability and security in the evolving digital landscape.

PROJECT 3 – Disney Hotstar + Clone   *(MARCH 2023 – MARCH 2023)*

- I created a website as a clone of Disney Hotstar+ for my virtual internship project with Devtown. The project utilized HTML, CSS, and JavaScript for development.
- The website closely resembled the interface and functionalities of Disney Hotstar+, offering users a similar viewing experience.
PROJECT 4 – RESPONSIVE PORTFOLIO
              TEMPERATURE PAGE & LANDPAGE   *(JUNE 2023 – JUNE 2023)*

- this three project and Second Virtual Internship Project by **Oasis infobyte**
- Using Html & CSS, etc
